

please find me for my client texts and slides about incremental backup in PostgreSQL 17 - look for resources in English and in German, give me top 6 resources for each language with short description and links

Here are the top resources for building your client texts and slides regarding PostgreSQL 17's native incremental backups.

To help frame your materials, the core narrative of this feature is that PostgreSQL 17 introduces native block-level incremental backups. Instead of relying entirely on external tools, PG17 utilizes a new WAL summarizer daemon (`summarize_wal`) that tracks which specific data blocks have changed. When running `pg_basebackup --incremental`, the system only pulls the modified blocks. The newly introduced `pg_combinebackup` utility then merges the base backup with these incremental snapshots to create a complete, restorable data directory. This drastically reduces the backup storage footprint and network overhead.

Top 6 English Resources

1. **Official PostgreSQL 17 Documentation:** `pg_combinebackup`
 - **Description:** The definitive technical reference for the new utility used to reconstruct full backups. Essential for establishing the baseline mechanics and command syntax in your technical texts.

2. **Official PostgreSQL 17 Documentation:** `pg_basebackup`
 - **Description:** Details the new `--incremental` parameter and the prerequisites, such as the WAL summarizer. Great for outlining implementation steps in client documentation.
 - **Link:** [postgresql.org/docs/17/app-pgbasebackup.html](https://www.postgresql.org/docs/17/app-pgbasebackup.html)
3. **PostgreSQL 17 Release Notes**
 - **Description:** The official summary of the feature. Perfect for introductory slides to provide authoritative confirmation of the new backup capabilities and general performance improvements.
 - **Link:** [postgresql.org/docs/17/release-17.html](https://www.postgresql.org/docs/17/release-17.html)
4. **Robert Haas' Blog: Incremental Backup Architecture**
 - **Description:** A deep, architectural dive by one of the lead developers on the feature. Highly useful for extracting the "why" and "how" of the block-level tracking to explain the internals to highly technical clients.
 - **Link:** rhaas.blogspot.com (Search: *Incremental Backup*)
5. **pganalyze: 5mins of Postgres**
 - **Description:** Provides concise, easily digestible breakdowns of how the WAL summarizer operates. Excellent source material for structuring short, impactful bullet points for presentation slides.

Top 6 German Resources

1. PostgreSQL 17 Offizielles Press Kit (Deutsch)

- **Description:** The official German press release. It provides the industry-standard vocabulary for these features in German, which is crucial for client-facing management summaries and high-level slides.
- **Link:** postgresql.org/about/press/presskit17/de/

2. credativ Blog

- **Description:** An ideal starting point for internal, high-quality DACH-region perspectives. The technical articles and release summaries published here are perfectly aligned for repurposing into client materials.
- **Link:** credativ.de/blog

3. PGConf.DE Archive

- **Description:** The slide archives from recent German PostgreSQL conferences. Reviewing recent talks on PG17 features provides a goldmine of pre-structured, community-vetted presentation material for your own decks.
